

MICHAEL HOGAN

Technical Support Specialist

Atlanta, GA • (770) 866-9271 • michaelrhogan@gmail.com • linkedin.com/in/michael-r-hogan

PROFESSIONAL SUMMARY

Customer Service and Technical Support leader with 15+ years of experience managing support teams, resolving complex technical issues, and building the processes that keep operations running smoothly. Known for translating technical problems into clear customer language and surfacing issues to engineering teams with the right context. Track record of leading high-volume support queues, training and mentoring agents, documenting procedures, and consistently driving first-contact resolution. Deep background in platform troubleshooting, CRM tools, and cross-functional collaboration. U.S. Army Veteran.

CORE COMPETENCIES

Technical Troubleshooting • Incident Management & Resolution • Help Desk Support • Ticketing Systems • SLA Compliance • First-Contact Resolution • Root Cause Analysis • Escalation Management • Remote Support • Knowledge Base Documentation • Onboarding & Training • Process Improvement • API Testing • PCI DSS Compliance

PROFESSIONAL EXPERIENCE

Security Professional | **Allied Universal Security**

Atlanta, GA • June 2026 – Present

- Conducted patrols and access control at assigned site(s), monitored surveillance/security systems/equipment, responded to emergencies and enforced site safety policies while maintaining a visible security presence.

Security Officer | **PSI Security**

Atlanta, GA • 2025 – June 2026

- Provided front-line customer support in a high-traffic hotel environment, assisting guests and staff while maintaining a calm, professional presence during time-sensitive situations.
- Maintained detailed incident reports and shift documentation, demonstrating accuracy, attention to detail, and clear written communication.
- Utilized technology systems for reporting, monitoring, and communication, adapting quickly to new tools and procedures.
- Built rapport with diverse clients and visitors, applying strong customer service skills to de-escalate concerns and support daily operations.

Technical Support Specialist | **Alorica (Verizon)**

Atlanta, GA • 2017 – 2024

- Handled 40–50 inbound technical and billing support contacts daily for Verizon customers, consistently meeting SLA targets and quality assurance benchmarks in a high-volume call center environment.
- Diagnosed and resolved Tier 1/Tier 2 platform navigation, account access, and service delivery issues, achieving strong first-contact resolution rates.
- Documented recurring technical issues and resolutions in team knowledge base, reducing repeat escalations and improving team response efficiency.
- Designed and delivered onboarding training for new hires covering systems navigation, call procedures, and troubleshooting workflows — reducing ramp-up time by 20%.
- Served as a peer escalation resource, mentoring colleagues on platform troubleshooting and account management procedures.

Software Engineer / Client Support Liaison | **CreSecure**

Atlanta, GA • 2008 – 2017

- Designed, built, and maintained a PCI DSS—compliant payment gateway supporting one-time and recurring transactions for enterprise clients, ensuring system reliability, security compliance, and zero-downtime uptime targets.
- Built a multi-stage API testing platform to validate mission-critical payment products, improving release quality and reducing production defect rates.
- Served as primary technical point of contact for 10+ enterprise clients, gathering requirements, diagnosing integration issues, and delivering rapid resolutions to maintain client satisfaction.
- Produced comprehensive technical documentation covering system architecture, integration guides, and support runbooks used by both internal teams and external clients.

UX Developer / Technical Support | [Acculynk](#) (concurrent with CreSecure)

Atlanta, GA • 2013 – 2016

- Collaborated with software development teams to implement and test eCommerce payment tools for client websites, directly applying expertise from payment gateway work at CreSecure.
- Optimized checkout flows and payment UI screens, reducing user friction and improving end-to-end transaction completion rates.
- Supported client onboarding and integration troubleshooting, providing hands-on technical guidance that accelerated time-to-adoption.
- Delivered weekly project status updates and milestone reports to stakeholders, ensuring on-time delivery and transparent communication.

Technical Support Representative | [Computer Generated Solutions \(CGS\)](#)

Remote • 1996 – 2000

- Delivered VIP-level technical support for IBM and Ford Motor Company executive users, handling hardware, software, and connectivity issues with a high standard of professionalism and speed.
- Diagnosed and resolved complex technical issues across Windows environments, maintaining high first-contact resolution rates and minimal escalation.
- Maintained detailed support logs and documentation, contributing to knowledge base articles used by the broader support team.

Signal Corps, Communications Specialist | [United States Army](#)

United States • 1990 – 1993

- Operated and maintained communications systems in support of mission-critical operations, ensuring reliable signal transmission in high-pressure environments.
- Developed strong discipline, teamwork, and the ability to perform under pressure — values that have defined a career in fast-paced support and service environments.
